Notification of Rejection(s) and/or Objection(s)

#	Claim(s)	Reference(s) (if applicable)	Rejection Statutory Basis	Brief Explanation of Rejection
1	none	none	Objection to Drawings	Fig. 3 and Fig. 4 are labeled for incorrect figures, they should switch with each other.
2	1, 5-10 and 13-17	none	Objection to Drawings	Feagures claimed, such as "rules" in claims 1, 5-7, and 13-17, "user preference" in claims 8-10 are not shown in Drawings
3	11	none	Object to Specification	The term "parsing" is not defined in specification therefore lacks antecedent basis. For examination purpose, examiner interprets as "choosing"
4	11	none	112(1)	"parsing" is not enabled, see objections to specification above
5	12	none	Objection to Claim	Minor informality needs to be corrected "can changed" to "can be changed"

#	Claim(s)	Reference(s) (if applicable)	Rejection Statutory Basis	Brief Explanation of Rejection
6	1	A, B	103(a)	Reference A discloses claim 1 (see fig.11A-B; col. 34, lines 45-48; col. 35, lines 27-41, merging images 1121 and 1123 to content layout elements according to rule (theme) in realtime before display; see col. 34, line 6, "wireless phones") (see cont' below)
7	2-3, 5-7 and 11-12	A, B	103(a)	Building on the rejection to claim 1, A-B discloses: claim 2 (A, col.30, lines 37-51); claim 3 (A, col.30, lines 27-31, "default theme layout"; col.35, lines 21-26, "static information stored with the theme"; col.30, lines 37-40 when no dynamic logic) (cont' below)
8	8 and 10	A, B, H	103(a)	A-B discloses retrieving skin image from designated remote server (A, fig.10, 1050; col.33, lines 11-30, "obtain content...from...external source... 1050") according to user preference (A, clm 33; col.7, lines 31-41), (cont' below)
9	9	A, B, H	103(a)	A-B discloses retrieving skin image from local stroage of wireless phone (A, fig.10, "Content"; col. 34, lines 1-7, "wireless phone") according to user preference (A, claim 33; col. 7, lines 31-41), (see cont. below)
10	13-17	A, B, H	103(a)	Building on the rejection of claim 10, A-B-H discloses: claim 13 (see A, col. 3, lines 62-66, "location signal"; col. 6, lines 28-35, "context model...geographic information (e.g., location and speed"; col. 34, lines 5-8, "wireless phone"); (see cont. below)

Expanded Discussion/Commentary

6	except for "hypertext language based pages ("content pages")" and "segmented skin image sections". B discloses segmented background image sections (col. 3, lines 21-37) and hypertext language based pages (col. 1, lines 23-30; col. 3, lines 7-11). It would have been obvious to apply reference B's segmented background image section and HTML method with reference A's teachings, in order to expand the banner to fit larger and/or higher resolution displays without using a separate GIF banner image for each targeted display type (see B, col. 2, lines 42-47).
7	claim 5 (B, col. 3, lines 32-43, merging image segments to content layout is performed by "the browser itself"); claim 6 (A, figure 12A-H; col. 6, lines 48-52, "user-specified"); claim 7 (A, col. 47, lines 5-7); claim 11 (A, col. 35, lines 30-37, map images are chosen based on content layout, to determine whether to display local map image or traffic map image); claim 12 (A, col. 19, lines 30-43, appropriate map image is displayed according to the selected predefined destination in the predefined layout/rule)
8	but does not disclose caching at remote system. H discloses retrieving web content from the cache memory of one of the designated remote servers (col. 4, lines 21-28). It would have been obvious to apply reference H's teaching of retrieving from cache of remote servers to teachings of A-B, in order for the data to be displayed on small screen devices in an efficient manner (H, col. 3, lines 42-45).
9	but does not expressly disclose the local stored contents are cached data. H discloses local caching (col. 4, lines 35-47, "retrieval data stored locally"; col. 3, lines 20-25, "Web browsers use a cache"; col. 4, lines 57-65, "small screen display device"). It would have been obvious to apply reference H's local caching system to A-B's teachings, in order to provide a faster response time for retrieving data than data stored in a remote cache (H, col. 4, lines 44-45)
10	claim 14 (see A, figure 11A-H, Starting the day theme, Drving to wrok theme, Arriving at work theme, etc); claim 15 (see A, col. 6, lines 37-40,); claim 16 (see A, figure 12A-H; col. 6, lines 48-52, "user-specified"; col. 34, line 6, "wireless phone"); claim 17 (see A, col. 47, lines 5-7)

#	Claim(s)	Reference(s) (if applicable)	Rejection Statutory Basis	Brief Explanation of Rejection
11	18	A, B, H	103(a)	Reference A discloses claim 18 (see citations of reference A in claim 1-2, and 8-9 rejections) except "image sections", "in response to a request received by a mobile phone", and "hyper text language based pages ("content pages")". (see cont. below)
12	4	A, B, I	103(a)	A-B does not disclose processed by Proxy Server. I discloses processing transcoding by a proxy server (figure 4). It would have been obvious to combine A-B and I regarding processing transcoding by a proxy server, (see continuation below)

Expanded Discussion/Commentary		
11		B discloses segmented background image section (col. 3, lines 21-37) and hypertext based pages (col.1,lines 23-30; col. 3,lines 7-11). It would have been obvious to apply B's segmented image section and HTML method with A,see similar motivation in claim 1 rejection. H discloses "in response to a request received by a mobile phone (col. 4, lines 21-25, 56-65). It would have been obvious to combine A-B with the teachings of H regarding "in response to a request received by a mobile phone". See similar motivation in claim 8 and 10 rejections.
12		in order to alleviate thin client from performing transcoding locally (I, col. 2, lines 21-24).
